Resources Design

M P Hindu Inter College   2020 - 2021
                                             12th UK Board

Projects

Personal Portfolios

- Mastering advanced HTML techniques allowed me to structure my portfolio content efficiently, including the use of semantic elements and accessibility features.

- Understanding CSS media queries enabled me to create responsive designs, ensuring my portfolio looks great across various devices and screen sizes

- Learning JavaScript DOM manipulation empowered me to dynamically update and modify elements on my portfolio webpage, enhancing user interaction and experience.

Weather Website

Creating a weather web application using HTML, CSS, JavaScript, AJAX, and JSON taught me the importance of API integration and asynchronous programming, enhancing my understanding of real-time data retrieval and manipulation in web development.
